SKILLS

Frameworks & Libraries:

- Next.js
- React.js
- Tailwind CSS

Backend Technologies:

- Node.js
- Express.js(basic)

Databases:

- MongoDB
- PostgreSQL

Tools & Others :

- Prisma
- Mongoose
- Git
- Gen AI tools

LANGUAGES

- JavaScript
- Python

EDUCATION

- Diploma in Information Technology

OBJECTIVE

"Mature and self-driven aspiring Web Developer with 8+ months of hands-on experience building responsive and scalable web applications using JavaScript, React, and Next.js. Developed multiple real-world projects with modern UI/UX and API integration. Passionate about writing efficient code and exploring AI-driven development to enhance productivity and problem-solving."

PROJECTS

Personal Portfolio Website (Next.js)

https://my-portfolio-nine-gules-73.vercel.app/ COMPLETE

- Improved page performance and achieved fast load times using Next.js optimization techniques
- Designed a fully responsive UI, ensuring smooth experience across mobile and desktop devices
- Structured reusable components, improving maintainability and development efficiency

Movie Discovery Web App (Next.js) COMPLETE

https://github.com/harshinfinite/next-movieapp

- Built a dynamic movie browsing application with API integration for real-time data fetching
- Developed modular and reusable components, improving scalability of the frontend
- Enhanced user experience with responsive design and clean UI structure
- Managed asynchronous data handling efficiently using modern JavaScript techniques

Scalable Full-Stack Blog Platform IN PROGRESS

https://github.com/harshinfinite/Full-stack-Blog

- Developing a full-stack application with authentication system (login/signup) and CRUD operations
- Focused on creating a production-ready structure with maintainable and clean code practices
- Designing backend architecture using Prisma ORM and database integration for scalability
- Focused on creating a production-ready structure with maintainable and clean code practices

ADDITIONAL INFORMATION

- Strong problem-solving skills with clear understanding of core programming concepts
- Exploring integration of AI tools to improve development efficiency and code quality
